

Supporting Your Horses Health With PureFlax Linseed/ Flaxseed Oil

Your horse's diet changes over the years, which can mean the Omega-3 & Omega-6 (which horses can't make in their own bodies) needed by your horse is not always present and as balanced as it should be. Any imbalance in these Essential Fatty Acids (EFA) can affect a horse's temperament, so adding PureFlax as a supplement in their diet all year round (cereal based diets tend to be high in Omega-6 but low in Omega-3) helps ensure this perfect balance of Omega-3 & Omega-6.

- ✓ Helps hard-working horses who need mobility and joint support
- ✓ Supports healthy tissues, the immune system and improves the efficiency with which horses turn their food into energy
- ✓ Performance and sporting horses benefit from help with muscle recovery and increased speed and stamina
- ✓ Horses can become less moody or excitable and easier to train
- ✓ Ideal for horses and ponies who need to maintain their general condition and health
- ✓ Aids broodmares with regular fertility cycles and health of the foal prone to infections

Supporting Your Horses Health With PureFlax Linseed/ Flaxseed Oil

- ✓ Research indicates breeding stallions supplemented with Omega-3 showed increased sperm concentration
- ✓ Nourish the coat, bones and hooves of horses of any age and helps maintain a healthy heart

Strong Hooves, Glossy Coats & Improved Performance

PureFlax Flax Seed Oil for horses helps horses and ponies maintain strong hooves, glossy coats and better all-round condition.

It is a great source of Natural Omega 3 and an important aid to digestion and also it is believed to help performance horse's development.

Beneficial For Muscles and Joints

Flax Oil has been shown to reduce the build-up of lactic acid in muscles, which is a common cause of fatigue in performance horses and supports the production of the enzymes and hormones.

It has also been shown to maintain equine endotoxemia which helps horses that are prone to laminitis. Research has indicated that supplementing a horse daily with Linseed Oil will, over time, have a beneficial effect on horses with stiff joints.

Why Choose PureFlax

Other vegetable oils available may be cheaper, but many are heat-treated or have chemicals added (either in the growing or in production) therefore they will not deliver the same benefits as PureFlax.

As a vegetable based oil, cold pressed PureFlax flax seed oil is a slow-release energy source which is – unlike some other oils – easy for dogs

Supporting Your Horses Health With PureFlax Linseed/ Flaxseed Oil

to digest and is a good source of Omega-6 Flax Seed Oil and one of the few vegetable sources that contains Omega-3.

Almost all blended oils are subjected to a heat extraction process with destroys most of the goodness leaving you feeding extra calories – but few other benefits – to your dog. If it doesn't say cold pressed on the bottle the oil will be heat or chemically extracted.

British, 100% Natural, Traceable & Fresh

Field to Bottle in just 400 yards, British Linseed and Fully Traceable. Grown and bottled on the PureFlax Farm in Yorkshire.

Preserving Natural Goodness

The cold-pressing technique used in the manufacture of PureFlax Flax Seed Oil preserves all the nutritional benefit of our oil.

No heat or chemicals are added to the seed or the oil at any stage – it is just cold-pressed and filtered. Just by smelling the oil you can tell how natural the product is.

Freshness Guaranteed

The key to great tasting flaxseed oil for your animals is the freshness.

This is why PureFlax Flax Seed Oil is pressed in small batches, so it when it reaches you, it is not already months old.
